About Me

Hello, I tried very hard to make this resume to the point. I am currently studying in **Meghnad Saha Institute of Technology**. I was not deeply connected with different technical aspects of computer science when I was in school. But the interest started to grow with time as I created my first blog in 2019. Finally, I decided to pursue my career in the field of web and computer when I saw the opportunity through JELET examination, 2021.

Project Work

Fake News Detection (Final Year Project)

Project Report Completed

By taking this project on, I got an opportunity to gather some hands-on experience on the vast and most popular technology of this era, Artificial Intelligence, Machine Learning and Deep Learning.

Personal Web applications

Hosted and uploaded on GitHub

It was very challenging for me to continue these small projects beside my academic education. But by accomplishing these projects, I learned a lot of things, like Languages, Frameworks, Api and also another important thing, Time Management.
